**TO WHOM SOEVER IT MAY CONCERN**

This is to inform that M/s Instruments care ( Chennai) is our dependable service provider for our department for servicing different instruments functioning in our department. Recently M/s Instruments care serviced the Varian Atomic Absorption Spectrophotometer, which was twenty years old and the instrument was abandoned by many service providers. But M/s Instruments care brought back the instrument in working condition and the instruments works very well. M/s Instruments care have very good service engineers who are well qualified to service all analytical instruments. It is good all institutions have partnership with M/s Instruments care for maintaining their all analytical instruments.

  
( P. Subramanian)
