**TO WHOM IT MAY CONCERN**

This to certify that the repairs and service works carried out by M/s. Instruments Care Chennai Pvt. Ltd., Chennai-600 053 is excellent in respect of the **MPF 44B Perkin Elmer Spectrofluorimeter and Applied Photophysics Xenon Lamp power supply**. I am also specifically mention that the above spectrofluorimeter is more than 25 years old and after their good service and extended support to us, the above equipment is working without any trouble for the past 10 years.

Due to their excellent technical knowledge, we conserved lot of funds towards the **import of spares for the equipments** like lamp power supply, control and signal processing unit in Femtosecond up-conversion spectrometer. I am also state that we solved many electronics problems in the equipments present in our laboratory with their help and discussing over phone. We are very much happy and very confident about M/s Instruments Care Chennai, towards the services to the scientific community.
